## Press Release

For release 10:00Eastern  
January 2007

### S.E.E.D.® Technology Center, LLC *"where technology makes sense"*

**Columbia, SC – January 10, 2007** – S.E.E.D.® Faith Ministries International, Inc., today announced the formation of its technology training subsidiary S.E.E.D.® Technology Center, LLC, that will focus on job specific training in a technology and computer-based learning environment, that will provide necessary training to the incarcerated, underprivileged and unskilled or under-skilled worker.

*"This is a major first step toward providing equal and affordable technology education opportunities to residents of South Carolina whereby those not traditionally serviced by existing academia will be able to get the same educational advantages afforded to the more privileged.",* said President Dr. B. Alexander Ingram

Our programs offer volunteers the opportunity to get involved by donating their time, talent and treasure toward the education of a young person, out of work adult or a person struggling in the job market. The program itself covers 3 areas of concern:

- job skills development and training,
- employment assistance and education, and
- welfare and prison to work training assistance.

In addition to needing volunteers as teachers, mentors and trainers, we are asking for your financial aid and support to underwrite these programs. We have partnered with several organizations throughout the Midlands to provide computers, printers, software, systems and we have recently received a small grant to deliver the first pilot program in the state.

One of our partners recently said, *"This program will definitely put South Carolina on the map when it comes to providing real-world learning and high-tech education".*
